Friendship EP

Another awesome 31337 release is out now – this time we present Sebastian Koch and Den! The guys teamed up to bring you an excellent minimal techno EP, absolutely true to the game. Many tracks these days get labeled as minimal while they really don't deserve the title. This EP is made with the attitude – less is more and it's exactly what it's like. The complexity of simplicity! No fancy leads or melodies, just funky techno music with subtle sounds and sampled field recordings put together with a lot of thought. Den proved his talent on labels such as on Unfoundsound, Them, Multi Vitamins and Clever Music. This man knows what he is doing and his sound is always exciting. Sebastian puts a lot of thought behind his tracks to keep them minimalistic, yet very groovy. He has great talent as well and those two guys put together was a really good choice. Included is also a nice bonus track by faerth with some magical textures, the perfect ending. We hope you enjoy this EP as much as we do!

Sebastian Koch

For Sebastian Koch it all started in 1996, where he began to spin Hip Hop records. In 1998 he visited the Tresor club for the first time and was so fascinated by the atmosphere, that his style changed completely. One year later he was playing for the first time at the legendary 'Headquarter-New-Faces' nights at the Tresor club. In the year 2005 Sebastian adopted the Berlin studio of the web radio 'Spiel-Trieb', which has its headquarter in Munich and works together with the well known club 'Harry Klein'. In 2007, together with 2 colleagues (0x7f & Subjunk), he founded the label '31337records'. The label is releasing international artists such as 'Den', 'Someone Else', 'Miskate', 'Easy Changes' to name a few. On this label he also released his first EP 'Friendship' along with Den. His style is straight minimal, sometimes dark, but always groovy techno. True to the motto 'less is more' or 'the art lies in the detail!' Quote: 'Sebastian Koch is one of the Berlin DJs who's putting lots of thoughts into their sets. His style is affected by lots of minimalistic details, which he skillfully puts together. Thus he's taking a path where he gives the interested listener the possibility to let himself fall into the music to understand its core, the minimal maximalism.'
